Accessory Data Sheet  
Fan Monitor Temperature Package

### Product Description

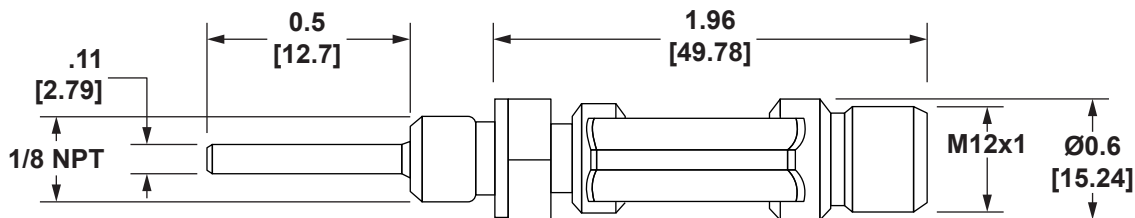

The FM Temperature Package is a sensor and mounting hardware that can be added to the Fan Monitor Hub. It allows for temperature to be monitored either in the airstream or on a bearing. The sensor requires a 8.5-32VDC power source and outputs a 4-20mA signal back to the Fan Monitor. The kit comes with both a locknut for duct mounting and a brass tee adapter for bearing mounting.

### Specifications

Operating Temp (plastic body)	-40 to 176F (-40 to 80C)
Probe Length	0.51" (13mm)
Output	4-20mA
Sensing Range	-58 to 230F (-50 to 110C)
Power Supply	8.5 to 32 VDC
Sensor Enclosure Rating	IP65
Accuracy	±0.2%
Sensor Cable Length	6.5 Feet

All Dimensions in inches [millimeters].
